

DRONTEC

Expert UAS conference for V4 countries

16 - 17 October 2024 | Piešťany, Slovakia

ABOUT THE CONFERENCE

The DRONTEX conference is the most prominent professional event in the V4 countries focused on unmanned technologies. It is held annually in Piešťany, Slovakia, and in addition to cutting-edge presentations in the field of safety, services and UAS operations, it offers space for networking, EXPO and an evening programme.

The program features speakers from EASA, GUTMA and other European organizations, ministries and government organizations, as well as representatives of the private, academic and non-profit sectors. In 2024, the 3rd edition of the conference will take place, which will once again map the current trends in unmanned aviation in the V4 countries, present technological innovations in the EXPO part and provide a space for formal and informal talks between experts.

GOALS OF THE CONFERENCE

- To present the current trends in unmanned operation in the V4 countries
- To bring together experts from the public, private and academic sectors and provide them with a space for networking
- To present current solutions in the field of security related to unmanned systems
- Communicate the topic of drones and the possibilities of their use in industry, services and government

170

attendees

technology companies
ANSP representatives
european and state institutions
development centres and academia

DRONTEX 2024 FOCUS

DRONTEX 2024 will thematically focus on U-Space and drone management in the V4 countries, the current security situation in Europe and the role of drones in national security structures, as well as the latest trends in advanced air mobility technologies and drone services.

Main Topics

UNMANNED TRAFFIC MANAGEMENT

- UTM solutions in V4 countries
- Harmonisation of manned and unmanned operations
- U-Space - how far we are?
- Manned VTOLs - reality and predictions

ADVANCED DRONE SERVICES

- Drone delivery in V4 countries
- Autonomous drone applications
- Use of drones in industry and services
- European research projects
- Advanced air mobility

UAS SECURITY

- Drones and their role in the current security situation in Europe
- Anti - drone systems
- The role of UAS in national security
- Special military unmanned systems
- Drone management systems for the military

16 October, 2024		17 October, 2024	
9:30 - 9:45	Welcome and opening speeches	9:30 - 9:40	Welcome and opening speeches
9:45 - 12:30	BLOCK 1: Unmanned traffic management in the V4 countries, ANSPs, EASA	9:40 - 12:40	BLOCK 1: The role of unmanned systems in European and national security
12:30 - 13:30	Lunch	12:40 - 13:40	Lunch
13:30 - 16:30	BLOCK 2: Advanced drone services: drone delivery, drones in space, UAS in industries and services, academic research	13:40 - 15:30	BLOCK 2: Anti-drone systems and UAS security technologies
16:30 - 19:00	Break	15:30	End of the conference
19:00 - 21:00	Dinner and networking	<p><i>Starting with DRONTEX 2024, we plan to add the possibility to attend the conference ONLINE and stream the main presentations on www.drontex.eu</i></p>	
21:00 - 22:30	Evening programme		

ABOUT THE ORGANISER

The **Mám Dron Association** is a civic association that strives to improve the conditions for the development of the drone community and economy in Slovakia. We prepare and realize educational events, provide information on unmanned technologies, and, along with the R-SYS company as our partner, manage the **free mobile application MamDron for safe flight planning** in Slovakia. In 2022, we successfully organized the first edition of the DRONTEX professional conference, and having received significant positive feedback from its audience, we are now working on the third edition in 2024.

OUR GOALS

- Spread awareness about the need for responsible use of unmanned aircraft systems
- Provide a technological tool for responsible drone flight planning (MamDron Information System)
- Nurture effective cooperation between private companies, government institutions and NGOs, and the academic community with the aim of developing drone services
- Broadcast the latest drone news via our communication channels
- Organise educational events on safe drone operations for general public
